Notes: Compatibility tests are conducted by Soraa only as guidance for the user
All tests are conducted under bench conditions; results may differ from test results depending on conditions at the application site
Unless otherwise noted, testing is done with a load of 1 lamp
Results may vary due to variability in component choices and manufacturing processes by the dimmer or transformer manufacturer
if the transformer's minimum wattage is not met, the lamp may only operate under nominal conditions (nominal line voltage and thermal conditions where the lamp is at full power).
if the fixture/transformer is not listed as tested, please consult with Soraa first before making any recommnedations to end customer.

	Dims to < 20%
